

**Name:** Australian course (walk and trot)

**Name:** Australian course (walk and trot)

**Course diagram:**

**Track required:** 90m track 2-4m wide

**Track variation for WT grading:** The track may be between 50 and 90m, with the spacing of targets appropriate for the length

**Equipment required:** 3 targets with either FITA80 targets (ie. round 80cm diameter 5-zone)

#### **Rules:**

The rules are based on the IHAA Raid rules with a few variations

Arrows can be held in the hand or in a quiver

The track set up for the triple shot is as shown in the diagram above: a forward first shot, a perpendicular 2nd shot, and backwards 3rd shot. The targets are set 7m from the edge of the track, and #1 and #3 are angled to the track edge 10m away.

For runs 1-3 only 1 arrow may be shot at each target

For runs 4-6 multiple arrows may be shot at each target

The course may be done at either walk or at trot

It is permitted to ride at a faster pace by accident

It is not permitted to ride at a slower pace; ie, if a horse stops during a walk class, or if a horse slows to a walk or halt during a trot class, then no points can be scored on this particular run (even if no arrows were shot when moving at this slower pace).

#### **Scoring:**

5 zone scoring: 1-5 pts

No time constraints/points

No multi-hit bonus points

If a horse slows to walk (during a trot class) or stops (for a walk or trot class) then no points are scored for that run.

If this happens there is no disqualification, scoring for all other runs is as normal

**Developed by:** Katrina Kruse (Australia)

**Historic aspect:** none

**Benefits:** Easier to safely set up in an indoor school with several participants as all shooting is directed towards the middle of the 90m run. A good introduction to Hungarian for beginners.

**Safety notes:** None
